

## Twenty Bale Grab

### Dimensions

Overall Width:	3850mm
Overall Length:	2500mm
Overall Height:	1000mm
Weight:	660kgs

The **Twenty Bale Grab** is built using a robust, extra heavy duty frame. There are 80 high strength tines for maximum bale coverage and heavy duty tine arms to avoid down time. The **Twenty Bale Grab** is designed to be used on the front of a large FWD tractor or ideally a tele handler. The **Twenty Bale Grab** is not designed for paddock work but is suited to warehouse or shed application. With the ability to move large volumes of hay-straw quickly this means trucks are unloaded or loaded and on there way in no time. The **Twenty Bale Grab** is sold without any loader attachments on it . This means that the purchaser can custom fit the grab to a tractor or tele handler to suit there application. We call this a bare grab.
